SKILLS SUMMARY

- Languages:** C, C++, Java, Python, JavaScript, TypeScript
- Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV, Scikit-image
- Tools/Platforms:** VS CODE, Git, GitHub, Docker, Kubernetes, Kaggle
- Backend:** MySQL, PostgreSQL, RESTful APIs, Firestore (Firebase)
- Soft Skills** Analytical Thinking, System Design Mindset, Clear Technical Communication

PROJECTS

Food Delivery App — Full-Stack MERN | [GITHUB](#)

Since Aug 2026

- Developing a full-stack food delivery platform enabling users to browse restaurants, explore food categories, add items to their cart, place orders and manage their profiles.
- Implementing features including restaurant discovery, cuisine filtering, favorites/wishlist, ratings and reviews, delivery-time estimates, offers/coupons and order management.
- Building the application using React.js, Node.js, Express.js, MongoDB, REST APIs, JWT authentication and Tailwind CSS, with reusable components and responsive UI.

MediRoute AI — AI-Powered Smart Emergency Healthcare Management System | [GITHUB](#)

Jul 2026– Aug 2026

- Engineered an AI-powered emergency healthcare management system connecting patients, hospitals, ambulances and blood banks on a centralized, real-time platform.
- Orchestrated AI-based medical triage, Emergency SOS, live ambulance tracking, hospital alerts and blood availability management to improve emergency response.
- Optimized Dijkstra's shortest-path algorithm for ambulance route optimization and implemented role-based authentication using supabase, JWT sessions and PostgreSQL Row-Level Security.
-

Multithreading Simulator — Thread Models & Synchronization | [GITHUB](#)

Mar 2025 – Apr 2025

- Designed an interactive simulator to visualize Many-to-One, One-to-Many and Many-to-Many multithreading models for understanding operating system concepts.
- Demonstrated interactive visualization of thread synchronization using semaphores, demonstrating thread states and synchronization mechanisms.
- Crafted a responsive educational web application using React, TypeScript, Vite, Tailwind CSS and shadcn/ui, with reusable UI components and interactive simulations.

TRAINING

DSA Placement Bootcamp – Master Data Structures & Algorithms for Industry | [Certificate](#)

Jun 2026 - Jul 2026

- Learned to think through problems step-by-step, built intuition, broke tasks into components, and followed a structured approach before coding.
- Practiced categorizing questions, spotting repetitive patterns, mapping new problems to known techniques, and selecting effective strategies confidently.
- Gained hands-on experience with major data structures and solved real interview-style problems using expert reasoning, best practices, and optimized methods.

ACHIEVEMENTS

- Solved 200+ Data Structures and Algorithms problems on LeetCode and GeeksForGeeks, improving algorithmic and analytical skills | LPU | [Links](#) Since Nov 2024
- Earned 3-Star Rating in Python Practice on HackerRank | [Links](#) Nov 2024

CERTIFICATES

- Database Management Part -1 | Infosys Springboard | [Certificate](#) Jul 2026
- Programming in Java | iamneo | [Certificate](#) Aug 2025
- Communication & Public Speaking Skills for a successful Carrer | LPU | [Certificate](#) Oct 2024

EDUCATION

- Lovely Professional University** Punjab, India Since Aug 2024
Bachelor of Technology - Computer Science and Engineering
CGPA: 6.76
